

SchoolCast Integration

What is SchoolCast?

SchoolCast is a rapid parent communication system that gives schools the ability to send out alerts for emergency and disaster purposes, as well as messages for nonemergency situations. The official SchoolCast feature list can be found at http://www.highground solutions.com/brochures/schoolcast_info.pdf.

How is School Dynamics Involved?

School Dynamics has partnered with High Ground Solutions (HGS) to save you time and hassle. If your school is subscribed to our SchoolCast Integration (SI) service, your student/family demographics and student codes are exported into your SchoolCast program. This export/import integration happens every 4 hours. **While our friendly support staff will be more than happy to help you with the SchoolCast Integration service, all other inquiries about SchoolCast should be directed toward HGS.**

Billing Information / Pricing

SchoolCast is billed monthly and the price is based on the current active enrollment at your school. Each month the price is recalculated as the active enrollment may fluctuate from one month to the next. If you are an existing customer, pricing can be found by logging into Omni and clicking on "SchoolCast". For all other price inquiries please contact our Sales department by calling (877) 265-8747 x2 or emailing us at sales@schoolynamics.net.
